(0060) 17-6509408

**Nationality: Iranian**

**Age: 27, Single**

**Place of resident: Kuala Lumpur, Malaysia**

**Email Address: [nima@javadev.org](mailto:nima@javadev.org)**

**Website: <http://www.javadev.org>**

**Blog: <http://javadevs.blogspot.com>**

### **EXPERIENCE**

- **Insynchro Co., Senior Developer** (7-September-2009 - Present)
- **Ahoora Land Co., J2EE Developer – Technical Manager** (10 -June -2000 - 20-December -2007).
- **Tooran Tarhe Douran Co., Director Manager** (20-February -2006 – 10-December-2007).
- **IT Orbit Co., Consultant, J2EE Developer** (15-December -2006 – 30-November-2007)

### **EDUCATION & Achievements**

- **Oracle Primavera Certified**, Kuala Lumpur, Malaysia, September 2009.
- **B.Sc.**, APIIT University, Kuala Lumpur, Malaysia, Jan. 2007 – Present, Software Engineering
- **B.Sc.**, Khaje Nasir University, Tehran, Iran, Sep. 2000 – Feb. 2005, Electrical Engineering Major in Power Engineering

### **TECHNICAL**

- **Programming Languages / Scripts / Markup Languages:** Java, PHP, XML, JavaScript, HTML/DHTML
- **Technologies:** EJB (2, 3), JSP, Servlet, JNDI, RMI, JAXP, JAXB, JAXP, JAXWS, JDBC, JTA, JAAS, JSTL, JSF, Custom Tags
- **Third Vendor Frameworks:** Struts, Spring, Acegi, Hibernate, Apache Myfaces, JBPM, JBoss Seam, Mule, Open ESB, Service Mix , IceFaces
- **Application/Web Servers:** BEA Weblogic, Jboss Application Server, Tomcat, GlassFish

- **Web Service Engines:** Apache SOAP, Apache Axis, Apache Axis2, Apache CXF, XFire, Restful Web Services
- **Building Tools:** Apache Ant, Apache Maven
- **Testing Tools:** JUnit, HTTPUnit, Cactus
- **Logging Tools:** Apache Log4J
- **Template Engines:** Apache Velocity, Free Marker
- **Reporting Tools:** Jasper Reports + IReport, Eclipse Birt, Crystal Reports
- **DataBases:** Oracle, MySQL, HSQLDB
- **Modeling Languages:** UML
- **Modeling Tools:** Power Designer, Rational Rose
- **IDEs:** NetBeans, IntelliJ Idea, Eclipse, JDeveloper, JBuilder
- **Version Controller:** Visual SourceSafe, SubVersion(SVN), CVS
- **Utilities:** Apache Commons
- **Project Management Tools:** Oracle Primavera

## ACTIVITIES

- **Oracle Primavera Integration**  
Integration of Oracle Primavera project management tool with different systems to exchange data.

- **Coach Ticketing System - Malaysia, January 2009**

Coach Ticketing System is a complete system for coach ticket reservation, it includes different modules for the users with different roles and privileges, The online module is for public people to do reservation, member module is for members only which can enjoy special rates and offers, agent module is for agencies which can enjoy payment by points instead of cash money, counter module is for counters that have extra features in comparison to other modules and the admin module which is a place for the system administrator to control the while projects via different reports, inquiries, master setting, ...

- **Hotel Reservation Project - Malaysia, July 2009**

This is a web service based project to reserve hotels all over the world, we are using web service calls to get the hotel information and to reserve hotels, this project has different modules for different user roles and privileges.

- **Remittance System - Malaysia, August 2008**

This is a money remittance system which is used to transfer and remit money between countries.

Money can be disbursed in cash or be deposited in the beneficiary account automatically. Rare conversions are handled automatically based on the master setting done by the system administrator. This is a complex project with lots of features to remit money in the best and the most secured way.

- **SPL (Software Product Line) – Iran, October 2007**

A large scale project based on SPL (Software Product Line) concepts.

SPL focuses on the software reusability and mass customizations.

It's composition of some core assets and variability diagrams which describe commonalities and variation points in a product line.

This project is based on the MDA concepts and the J2EE platform and consists of different technologies and frameworks like *ESB(MULE)*, *Portal(Liferay)*, *CMS(Alfresco)*, *DMS(Contineo)*, *Security Providers(JAAS Based)*, *Workflow(JBPM)*, *Web Services (Apache Axis2, REST)*, *RDBMS (Oracle)*, *Report Engine*, *Form Generator*, *Logger*, *Log Analyzer*, *Template Engines(Apache Velocity)*, ...

- **Access Control Module – Iran, June 2007**

JAAS based authentication, authorization, role mapping and auditing providers for different application servers, especially Weblogic AS and an administration console for managing providers. These security providers and administration console can be integrated with any system to provide its security including authentication, authorization.

- **Audit Server – Iran, March 2007**

Audit Server logs all the events in different applications. These events are searchable and can be navigated.

- **MoMenu (Restaurant Automation Application) – Iran, December 2006**

J2EE & J2ME based restaurant automation application which is used by the restaurant managers to receive client's orders from mobile, manage the requests and deliver them via the web-base admin console.

- **Mobile Management Club – Iran, July 2006**

J2EE & J2ME based application which is used by the football team managers and fans. Managers can buy their own team and track team progress and do whatever a manager or coach needs for managing his/her own team such as arrangement, exercises, substitutes ...

- **Document Management System – Iran, April 2006**

Based on the continuo open source project, we improved its security, localized it and added Persian support.

- **Lorestan Province Portal – Iran, February 2000**

- **Redesigning the web-based part of the Compiere open source ERP – Iran, February 2005**

- **Custom Weblogic security provider – Iran, Jnauary 2006**

- **Customization and Localization of the Liferay open source Portal – Iran, June 2005**

- **Integrating the Liferay portal with the Compiere ERP – Iran, June 2005**

- **Task Manager System – Iran, August 2002**

- **Security Administration Project – Iran, October 2004**

- **Adding Security Features to the Eclipse Birt Report Engine – Iran, November 2004**

- **Persian (Solar) Calendar (Java Based, Ajax Based, Portlet) – Iran, September 2005**

- **Web-Based SQL Scratch Pad – Iran, March 2007**

### **Teaching Experiences**

- **Introduction to J2EE – Iran, March 2006**

- **EJB Development and Design Patterns – Iran, January 2007**

- **Application Development Using Struts, Spring, Hibernate – Iran, June 2007**

- **J2EE Development Without EJB – Iran, August 2007**

### **Articles (Available in my website)**

- **Page Ranking Implemented in Java – November 2009**

- **How to develop JAAS security on JBoss AS – November 2008**

- How to REST (Representational State Transfer) – July 2007
- Weblogic Clustering – January 2007
